

## Zinc Digest

Zinc is the treatment of choice for the maintenance therapy of Wilson disease because of its ability to block the intestinal absorption of copper. Not all supplements are created equal. There are some important factors to consider when selecting an appropriate Zinc supplement, such as fillers and binders, as well as purity of raw materials.

Beyond a product's formulation, dosage form is also an important factor to consider. People taking Zinc supplements have run into the issue of what seems to be unnecessarily over-sized caplets. Due to the large size of the caplets or tablets, it can be very difficult to swallow many of the Zinc supplements currently on the market. These pills also contain those fillers and binders that may increase the consumer's exposure to potential allergic reactions from ingredients, such as starch.

extreme V, Inc is proud to share some good news for Zinc supplement takers. After analyzing these issues, extreme V<sup>TM</sup> has produced a pharmaceutical grade Zinc Gluconate supplement available as Gluzin<sup>TM</sup> in capsule sizes that are easy to swallow. The capsules contain the highest purity raw ingredients, the absolute minimal amount of excipient, and no starch that could cause allergic reaction to some consumers.

extreme V<sup>TM</sup>, Inc is introducing Gluzin<sup>TM</sup> in order to provide customers with an effective solution to the problem of questionable supplements. Gluzin<sup>TM</sup> is a Zinc product, which can be trusted to contain superior consistency, purity, and quality.

extreme V<sup>TM</sup> shall collaborate with the Wilson Disease Association to provide this quality product benefit directly to its members.

GLUZIN<sup>TM</sup>

WHEN YOU THINK ZINC, THINK GLUZIN<sup>TM</sup>

GLUZIN<sup>TM</sup> supports the replenishment of normal healthy Zinc levels and balances the interactions of your essential trace elements. Gluzin<sup>TM</sup> is formulated with Pharmaceutical Grade Zinc Gluconate. Zinc is a naturally occurring mineral and is essential for immune system health. Gluzin has been formulated with minimum fillers to help reduce allergic reactions.\*

Gluzin<sup>TM</sup> induces intestinal cell metallothionein, thereby blocking the absorption of copper in the body. Please consult your physician for proper dosing and monitoring regimens.\*

AVAILABLE IN TWO CAPSULE DOSAGE FORMS:

25 mg (Capsule Size 3) and 50 mg (Capsule Size 1) Zinc Equivalent - Easier to swallow capsule size.
